A. McKinney is adding about fifty pens to his fox farm.

T. P. Lewis bought a new Chevrolet roadster last week.

Born, on October 4, to Mr. and Mrs. Wm. Hughes, a daughter.

Born, October 6, to Mr. and Mrs. A. D. Colman of Calgary, a son.

Mr. and Mrs. A. H. Wallis are spending the week end in Calgary.

W. S. Keeley and family left on Thursday for their new home in Baffin.

Ben Conitt's baby, who has been seriously ill, is reported steadily improving.

The Starline W. I. was entertained by Mrs. Tim Chilton at her home on Thursday.

Born, to Mr. and Mrs. C. G. Gunderson, on October 5, at the local hospital, a son.

Born, at the local hospital, on September 30, to Mr. and Mrs. T. P. Lewis, a daughter.

Mrs. Dickmeier entertained at bridge on Wednesday evening in honor of Mrs. Keeley.

Mrs. Harry Gordon is the local hospital for a surgical operation which she will undergo today.

Wild geese in great numbers passed over here the first of the week on their way southward.

Rev. Barlow, new rector of St. John's Church of England, with his family, arrived on Tuesday.

Mrs. Barlow is about again after being laid up for several days by a severe attack of lumbago.

Mrs. O. L. Reinecke and daughter, Arline, are expected home on Monday from their eastern visit.

Flower lovers are delighted with the quality of the fall planting bulbs on display at Ligon's & Harvey's store.

About thirty-five of the Catholic ladies met at Mrs. Sharple's last Friday for tea, and presented Mrs. Keeley with a fine table lamp.

Mayo's Chilton, small daughter of Mr. and Mrs. J. Chilton, has been ill this week following the vaccine serum treatment for scarlet fever.

At the Rex theater Friday and Saturday nights this week, Marshall Neilan's production "The Great Love" from the producer's own story.

J. Lang has moved his harness shop to the rooms for some time past occupied by S. L. Fraser, west of our south side of the Bank of Commerce.

Mrs. Will Lewis and mother, Mrs. J. R. Chilton left on Thursday for Walla Walla, Washington, to visit Mrs. Chilton's daughter Mrs. Roy Wallace.

There will be no picture at the Rex theater on Friday night next week, October 22nd, on account of the big road show, "So This is London" playing on that night.

Wet snow on Sunday, and again on Tuesday night, further delayed threshing in this district to some extent.

With fair weather since that time however all outfits are at work and grain is rolling in to the elevators in large quantities.

Mrs. John Fraser was hostess to the Sunshine Club on Saturday afternoon, at a special meeting to arrange for a bazaar and sale of household goods to be given by the club members at the I. O. O. F. Hall on Saturday afternoon, November 6th.

Mrs. H. A. Fairbairn and infant daughter returned home last week from visiting relatives and friends in Ontario and Saskatchewan.

S. L. Fraser still shortly move his real estate office to the rooms recently vacated by Dr. Hynes, in the Reinecke building, and Dr. Hynes has moved upstairs in the same building.

Last week a harvester forged Mr. Strangways' name to a cheque and passed it at Mackintosh's store and immediately left town. The police are on the large's trail but he has not yet been captured.

W. K. Cornish, who has been in charge of the Gas Company's business in Clareholm, Granum and Macleod for some time past, has this week moved to Granum, which being centrally located will enable him to handle the three towns to better advantage.

Mrs. T. P. Lewis and infant daughter returned home from the Clareholm hospital on Tuesday. Elaine, the oldest daughter, who was taken with scarlet fever on the day her mother went to the hospital, is able to be up again, having had the fever in a very mild form.

Mrs. L. C. McKinney was again elected president of the Alberta W. C. T. U. at the provincial convention held at Red Deer last week. It was decided during the convention that a pledge signing campaign would be undertaken Sunday, October 31, in all the churches and Sunday schools of the province.

Wrestling match, at the Rex theater next Wednesday night, October 20, between John Aberg, "the Terrible Swede," and Count Nicholas Desek, "the Russian Lion." Aberg is said to have wrestled over 1800 matches, including four world's champions, Strangler Lewis, Joe Stetcher, Farmer Burns and Frank Gutch. The match will be two out of three falls, catch-as-catch-can. Good preliminaries are also promised. Admission prices will be \$1.50 for ringside and \$1.00 for rush seats.

Distinguished Visitors Coming

It has become known to a few old friends in town that Sir Percy and Lady Beauchamp and their daughter, Elinor, of Brimston, England, accompanied by Lady Duxworth who owns the adjoining estate to theirs, will in the course of the next week make a short visit here during a leisurely trip they are making across Canada from the Pacific to the Atlantic seaboard.

Sir Percy writes that he and his party are especially pleased to know that coincident with their stop here they will have the opportunity of again witnessing "So This is London," which they remember seeing with great enjoyment during its initial run at the Prince of Wales Theatre in London. "Without fail," he writes, "we shall be among those present."

To Lecture Here

Dr. Alexander, of Chicago, Ill., the noted character analyst, who has been creating a furore in High River, will visit Clareholm next week. The press of the largest cities all over the country speak in the most flattering terms of his work. It is unusual lectures to attract crowds from Halifax to Vancouver. In all cities the crowds have been so large that theaters were often too small to hold those anxious to hear Dr. Alexander. The Vancouver Province says of him that his lectures are both "an education and an inspiration." He is no believer in the old "humbuggery" and is easily in the front rank of exponents of human nature today, and has won his place by the accuracy and skill of his demonstrations, illustrating a marvellous knowledge of the science. In Saskatoon, Prince Albert, North Battleford, Edmonton and Lloydminster for three weeks in each there was standing room only. As the first shows are over the hall will no doubt be crowded. He opens at the Odd Fellows' Hall, Clareholm, Monday night, October 18.

EARLY COUGHS

October, with its warm days and cool nights, marks the start of the cough and cold season and foolish indeed are those who neglect these early coughs.

NYAL CREOPHOS

will relieve them promptly and build up strength for the forthcoming winter. Our advice is to fortify the system now with Creophos so you can face cold weather with assurance of good health.

Ask us about Creophos.

"is good tea"

Over 30 years a standard wherever good tea is liked.

What Trade Treaties Mean To Canada

The tumult and the shouting is over, the ballots have been cast and counted, and the standing of the two major political parties in the House of Commons has been reversed. Whereas in the last election Liberalism was the dominant force, it is now the Conservatives who are in the saddle. That is the completion of the new House of Commons makes possible a more stable form of government than existed in the last two Parliaments.

Then over and above, the clear-cut majority of the Liberal and Conservative parties in the House of Commons, the Liberal Administration, numerous Progressives, Independents, Labor and United Farmer members, practically all of whom represent Western constituencies, can be depended upon to give their consistent support to a Government pledged to the carrying out of Liberal policy.

In other words, in the new Parliament, unlike the old, there is a clear majority of members returned in support of one particular leader and who represent constituencies in the House of Commons. That is the completion of the new House of Commons makes possible a more stable form of government than existed in the last two Parliaments.

Then over and above, the clear-cut majority of the Liberal and Conservative parties in the House of Commons, the Liberal Administration, numerous Progressives, Independents, Labor and United Farmer members, practically all of whom represent Western constituencies, can be depended upon to give their consistent support to a Government pledged to the carrying out of Liberal policy.

Now that the battle is over, and the general verdict of the electors abetted, even those who would have preferred to see Mr. McLaughlin and his party return, will find it difficult to dispute the fact that the result has been fairly decisive and the statements which have prevailed for so long to the disadvantage of the whole country, broken. It is what both the main political parties desired and asked for, and what it has been demonstrated a majority of the electors wanted.

And now to business. Let everybody settle down to the task of settling Canada to a peaceful and stable government and let the business of the country go on as usual.

In this column last week the view was expressed that whatever party was placed in power should devote its energies to the further promotion of the policy of negotiating trade treaties with other countries, and particularly with all other sister nations within the Empire, and thus open to Canadian producers and manufacturers larger and more profitable markets. We now have in power a government which has declared its intention to carry out this policy, and it is to be hoped that it will be able to do so.

On the day of the election a large display advertisement—not of political character—was inserted in Canadian papers by one of the largest export companies in the world, the Canadian Manufacturers' Association. It was headed by the title "The Millions Called by Export are Millions Saved for You," and it went on to point out that it was owing to the rapid increase in its export business that reduction in the price of goods had been made possible in Canada, because of the enormous volume of production and consequent increase in efficiency and in lower production costs. It was not a fair shutting out competition which had brought increased prosperity to this firm, but the opening of new and wider markets abroad through trade treaties, leading to greater production, larger purchases of materials in Canada, and the employment of many hundreds more of Canadian workers.

Now evidence of a similar sentiment is found in an article by the chairman of the British Columbia Division of the Canadian Manufacturers' Association who gives a long list of both direct and indirect benefits accruing to Canada from the recently negotiated trade treaties with Australia, and which he estimates amount to the value of \$10,000,000 per annum. This same Manufacturers' Association official makes a strong plea for a continuation of this policy of negotiating trade treaties, and above all, that a stop be put to the making of a political blunder out of such matters.

It is right and proper that trade treaties should be carefully examined and fully discussed by Parliament and the people of Canada, but when they have been approved and put into effect the efforts of petty politicians to try and secure party capital at the expense of the country should be stopped. It is one set of people against the treaty because of some one particular item in it, and another set because of some other item, instead of viewing the treaty in its entirety and seeing that it is for the benefit of the country.

Canada is to prosper and grow greater, and employment found for an ever increasing number of people, that surplus must be profitably disposed of in foreign markets. In order to obtain entry into these markets on the most advantageous terms, Canada must offer some concessions in return. That is only business, and the same principles must govern in international business as in private and domestic business relations.

Important Scientific Discovery

Claim Nickel and Cobalt Benefits Cases of Diabetes

Professor Gabriel Bertrand, director of the biological chemical laboratory of the Pasteur Institute, Paris, is the authority for the announcement before the American Chemical Society that experiments with nickel and cobalt have produced encouraging results in the treatment of diabetes.

The biological experiments conducted by Prof. Bertrand and associates, he stated, first with nickel or cobalt alone and then with a mixture of the two have produced encouraging results in the treatment of diabetes.

The biological experiments conducted by Prof. Bertrand and associates, he stated, first with nickel or cobalt alone and then with a mixture of the two have produced encouraging results in the treatment of diabetes.

The two metals, the professor added, had been found present in the human body especially the pancreas gland.

Invention Of Russian Scientist

New Method to Extract Many Products From Coal

From 500 tons of coal a Russian scientist would extract, by a new method which he has invented, and which is being seriously considered in Great Britain, the following products:

2,000 gallons of gasoline. 6,000 gallons of kerosene. 3,000 gallons of lubricating oil. 12,000 pounds of paraffin wax. 20,000 pounds of phenol. 40,000 pounds of pitch. 12,000 pounds sulphate of ammonia. 12,000 pounds of sulphur.

And even after that he would have left 374 tons of smokeless fuel that would give a greater heat than coal. Dr. Paul Dvorzhitsky, the inventor of this process, is said to have interested British financiers and engineers in the project—New York Times.

Achievement In Europe

Lady Astor Tells Americans They Should Rejoice

Americans should rejoice in Europe's new progress rather than "hold up their hands in horror at the present situation," Viscountess Astor, M.P., declared in New York.

The admission of Germany into the League of Nations, with "the world's greatest war only eight years ago," was not an achievement of the League of Nations, which Europe was proud, "no matter what you in America think."

In her address before the Women's Voters, Lady Astor said that while "many thinking people" believe the League of Nations has failed, "the course in the matter of international debts, she was not 'discouraged by national or international mistakes.'"

Nations learn from their mistakes, at least some do," she said, "and there is no reason to be disappointed."

The First Air "Sleeper"

Was Operated Recently By Germans Between Berlin and London

London saw its first flying sleeping car recently when a German aeroplane arrived at Croydon from Berlin. It was the Albatross T-2, a winged biplane capable of rushing about silently through the night, with four persons sleeping in luxurious beds in the cabin. The passengers' cabins have electric lights and running water, and by day the berths can be converted into seats.

Mr. Ruth, of the Albatross company, designer of the plane, was aboard when he arrived in England.

His Star Of Destiny

Premier Mussolini of Italy Thinks He Will Die a Natural Death

Premier Mussolini believes that the star of destiny protects him from natural death, and that he will die a natural death.

That is what he told Robert H. Davis, of the New York Sun, who was received by the premier after the recent attempt on his life. Mr. Davis says:

"I saw Mussolini in the every room at the Chigi Palace, from the windows of which he addressed an impassioned speech to the people after the latest attempt on his life in the last ten months."

"You ask why I do not protect what I call my person from the assassin he said. 'There is no need. My star protects me as Italy is protected. I shall die a natural death. As I live now, there must be adventure, and I must be free to come and go among the people, always my people.'"

To Build Mills In Canada For The Manufacture Of Artificial Silk From Pulpwood

When we gaze on a great forest tree it is not easy to visualize it in terms of rich clothing materials. And yet man, God's greatest gift, cotton, wool, linen and a number of lesser sources of clothing material, now employs wood for the manufacture of the latest textures—artificial silk or rayon, as it is called by the trade. The basis of all artificial silk is cellulose, and cellulose is the principal constituent of wood.

As long ago as 1880, Count Hilarie de Chandonne produced artificial silk commercially, but it has taken many years of incessant labor to bring the various processes to that stage of perfection which is essential to commercial success. That the industry has now become a great undertaking is shown by the fact that the world's production in tons has arisen from 2,500 in 1901 to an estimated 100,000 for this year.

The general principle underlying the manufacturing methods is the treatment of the cellulose with chemical reagents to give it the desired quality which can be forced through a number of minute nozzles into a bath of solution (or in some cases into air). This solution causes the coagulation of the liquid emerging from the nozzles and thus causes the actual formation of artificial silk threads. The material has to pass through several other stages, varying with the process, before it finally emerges as the finished textile ready for use.

The possibilities for rayon manufacture in Canada, with her vast pulpwood areas, are enormous. The countries which were first to develop the industry, however, were those which possessed no such raw materials, but those which already had the organization, the equipment and the markets for a big textile industry. Thus, shortly before the war, France, already pre-eminence in the manufacture of natural silk, took the lead, followed by Switzerland.

The pulpwood resources of the United States, Great Britain and the countries of Central Europe that are producers in the natural silk trade. For a good many years Canada has supplied much of the sulphate pulp for that purpose. Now the pulpwood resources of the Canadian department of the interior published a report showing that the country is unusually favorable conditions for the development within the Dominion of artificial silk manufacturing in its entirety. The following year, Corbett, Ltd., largest manufacturers in Canada to inventors, sent engineers to Canada to investigate the possibilities, with the result that a plant was established in Cornwall, Ontario, in 1925, and since that time this would appear to be but the preliminary of many others. Canadian Celanese, Ltd., capitalized at \$7,000,000, is now constructing a plant at Drummondville, Quebec, and the Howard Shulze Paper Mills have formed a subsidiary company to exploit the Canadian Cellulose Company, which will be operated at Cornwall, Ontario. A new company, the Canadian Rayon Pulp Company, is receiving a \$2,000,000 rayon plant at New Westminster, B.C. The B.C. Pulp and Paper Company, formerly the Western Pulp and Paper Company, operating pulp mills in British Columbia, has been carrying on thorough research for some time in the utilization of lumber for the production of cellulose and rayon results and conclusions have been reached. It is stated, may determine the conditions to proceed with installation of a new plant for the manufacture of rayon in B.C. Many other companies variously located from the Maritime Provinces to the Pacific Coast are also taking steps or considering means to enter this field which is so profitable, so large, and which Canadian resources present their cards. Comparing them with that of its neighbors, the Celanese replied, "Tickets no good. Can't come in."—The Outlook.

Win Butter Prizes

Saskatchewan Buttermakers Are Successful At Toronto Exhibition.
Saskatchewan buttermakers won many prizes at both the Canadian National Exhibition at Toronto and the Central Canada Exhibition at Ottawa. At both exhibitions the prizes were awarded on the group system and Saskatchewan buttermakers were not the best of the list in practically every class.

Saskatchewan won 17 prizes, seven of which were firsts, at the Canadian National show, an accomplishment of which Saskatchewan buttermakers may justly feel proud. At P. E. Reid, provincial dairy commissioner, in commenting upon the success of the buttermakers of this province at the big eastern fair, coming on the heels of the big winnings recently at Vancouver. The showing at Ottawa, where medals were won by so many entries from this province, is also said to be very creditable.

Influenza In North

Taking Heavy Toll Among Native People.
Influenza is taking a heavy toll among the natives of Canadian and Alaskan territories bordering on the Arctic Ocean, according to Captain Klenberg, owner and master of the fur trading schooner Old Maid, who is en route to Vancouver from a voyage as far as Victoria. In a sparsely settled district near Herschel, according to the captain, one hundred men and women had died when he was there in July, and at Coronation Gulf, there had been several deaths and many were seriously ill.

Although the captain said the fur trade in the western Arctic last winter was not good, owing to the influence of the natives of influenza, he expected his fur cargo to be worth 100,000. He plans to dispose of it on the Seattle Fur Exchange.

Strawberries In Saskatchewan

Grown In Commercial Quantities In The Nipawin District.
Strawberry growing in commercial quantities north of latitude 53 is the proud accomplishment of the Nipawin district in Saskatchewan. The area has been successfully grown there for the past 12 years, but owing to lack of transportation facilities was not so good, owing to the fact that in the autumn of 1924, when the Tufford-Albert extension of the Canadian Pacific Railway was completed, it did not become a commercial crop.

In 1925 several thousand 25-pint cases were shipped, some of them to the west as far as Winnipeg and Regina. The production is expected to be nearly double that of last season.

Maple Sugar Output

Unseasonable Weather Cuts Down Production This Year.
Owing to the unseasonable weather during the tapping season, the production of maple syrup and sugar in Canada this year showed a decrease compared with the figures for the previous year. The quantity of maple sugar produced in 1925 amounted to 7,137,265 pounds, valued at \$1,229,527, as compared with 10,196,252 pounds, worth \$1,517,072 in 1924. Maple syrup output totaled 1,746,172 gallons, valued at \$2,577,525, as against 1,672,093 gallons, valued at \$1,426,225 last year. The percentage of production to produce over the total Dominion production of maple syrup and sugar.

Coal Production For June

The output of coal from Canadian mines for the month of June was 47 per cent greater than the average for that month of the five previous years, the monthly report of the Dominion bureau of statistics announces. The figures were 1,287,040 tons in June as against 1,184,734 tons in May and an average of 849,912 tons for the month of June during the five preceding years.

Couldn't Fool Him

A woman was having difficulty in teaching her new Chinese servant how to weave calling cards. She went outside and entered her own card. The next day two women called and presented their cards. Comparing them with that of his mistress, the Chinese replied, "Tickets no good. Can't come in."—The Outlook.

The one country in Europe that lies outside the pale of copyright is Jugoslavia.

Add Billion To Income

Products Of Farms Of Western Canada Add To National Wealth.

In a recent dispatch to the Toronto Globe, W. J. Smith, special correspondent of The Globe, and a former editor of the Farmer's Star, estimates that approximately \$100,000,000 worth of products of the farms of Western Canada will be added to Canada's income this year.

Directly and indirectly, from the products of the farms of Western Canada. Last year's wheat crop was worth \$400,000,000 to the growers, and it put the wheat in the prosperity column. Mr. Smith believes it is a fair assumption that this year's return will not be less. "Western Canada is going into general farming more fully than in the past, and livestock, poultry, dairy products and vegetables will also up the return at every point of handling. Altogether a round million in sight," states Mr. Smith.

The prospect is encouraging for the whole of Canada. Last year the field crops of the country were valued at \$1,112,691,000. The east this year will also add to the national wealth, the west's contribution to national wealth.

Will Pay Prizes

Alberta Department of Agriculture Will Grant Honorariums to Prize Winners.

The usual honors for grand championships and first prizes won by Alberta exhibitors at the Chicago International Exhibition to be held the first week of next September will be paid this year by the Alberta department of agriculture. The honorariums for grand champions will be \$150, and for a first prize \$100. In the international fair and grain show. The exhibits from Alberta for this show will be collected by the department at the government seed clearing plant, and the department will pay the freight or express on these exhibits from Edmonton to Chicago and return, and will arrange to put the exhibits in place. The special prizes offered by the department are for dressed grains, grass seed, clover seeds, baled hay, alfalfa, corn on the cob etc.

Desirable Trait In "Huskies"

One Of Most Important In Learning To Halt On Command.
In Alaska a good team of "huskies" now brings \$500 to \$700, depending upon their strength and the efficiency of their training. One of the most desirable traits in a dog used for team work is his training to halt on command. It is necessary because the great danger of sled travel is the sleds in the ice. To teach them they are often allowed to plunge into an ice hold trap so that the chilly bath may be remembered.

Step

The average amount of "absolute rest" that is gotten during a night's sleep is only 11½ minutes according to Prof. H. M. Johnson, of the Mellon Institute at Pittsburgh. The remainder of the time he says there is usually muscular or mental action, such as take place during a dream. Seven and three-quarter hours of sleep is plenty for any normal man or woman, the scientist declares—New York Herald.

Highlanders Present "Big Horn" Head

The mounted head of a Rocky Mountain sheep was presented recently to Lt. Colonel C. P. James, D.S.O., commanding the Argill and Sutherland Highlanders at Parkhurst, Isle of Wight, by Colonel McLaren, M.C.B., European general manager of the Canadian Pacific Railway. The head was sent forward from Banff by the 1st Battalion Calgary Highlanders, 10th Battalion C.R.P., in commemoration of the fact that they have become affiliated with the Argill and Sutherland Highlanders. Sir George is also honorary

Planning For World's Poultry Congress

Many Nations Sending Delegates To Ottawa Next Summer.

Sixteen foreign countries have all received invitations to send delegates to the world's poultry congress, to be held in Ottawa next summer. It was stated at a meeting of the congress preparatory committee at the Canadian National Exhibition. Reports were received from committee members on different features of the congress and all reported progress in their work of arranging for the largest gathering of poultry men since the war has ever taken place in the Dominion.

The United States has agreed to enter 1,000 automobiles to take part in the tour which is being arranged from United States border points to Ottawa and the American Poultry Association will stage one of the largest foreign exhibits to be presented at the congress.

Canada is sending a large delegation. Royalty will be represented at the show, the Prince of Wales having decided to exhibit a valuable deposit of the royal coat of arms.

Lord Willington, Canada's new governor-general, will be the chief patron of the congress. Preparations have been made to take a number of the foreign delegates on a tour of Canada from coast to coast.

Prefer Canadian Wheat

Purchasing Agent From Cuba Buys Canadian Goods.

Canadian hand spring wheat is preferred to all other varieties in Cuba according to J. E. Gonzalez, purchasing agent for the Government of Cuba, who was recently in Montreal buying Canadian goods for his country. The annual exports of Canada to Cuba total in value nearly \$5,000,000. When in Montreal, Mr. Gonzalez arranged for the purchase of \$5,750,000 worth of potatoes for later delivery. He will also buy quantities of flour, hay, and other products.

It will be only a few years before the annual Cuban consumption of Canadian grain will assume much larger proportions, said Mr. Gonzalez. A project was on foot to erect large flour mills at Havana, and when those were finished, the demand for Canadian hard wheat would be more than quadrupled.

Knew Them All

The girl—Hello, Nellie speaking.
Ladies—If for Ludwig, U for Ulrich, D for Dietrich, W for William, I for Ignatz, G for George—
Dad, dearest, just which one of the six are you?—Elegance Blatter, Munich.

Beer Consumption Lower In Germany
Germany, once known as a nation of beer and coffee drinkers, is turning to wine and chocolate. The high price of a stein of beer, the government reports, has cut the annual consumption from 162 liters for every man, woman and child to 72 liters. Coffee consumption has been cut in half, the average cost per pound being about one dollar.

Farming Is The Fundamental Source Of Canada's Wealth And Basis Of Our Prosperity

A Little Known Industry

Mining For Timber Has Become Important Business.

Digging in the earth for minerals is no new thing, but it is not generally known that mining for timber has been carried on since prehistoric times and is now a big business. In a wide swamp near Chicago quantities of white oak logs are being recovered, the remains of a great forest that was submerged seven or eight thousand years ago. Although the outer layers of wood have decayed, some chemical agent in the soil has made the remainder hard and durable and given it a delicate color, for which it is much prized.

Canada is feeling a large depletion. Royalty will be represented at the show, the Prince of Wales having decided to exhibit a valuable deposit of the royal coat of arms. Lord Willington, Canada's new governor-general, will be the chief patron of the congress. Preparations have been made to take a number of the foreign delegates on a tour of Canada from coast to coast.

Should Eat Little Meat
Drink More Milk and Add Eight Eggs to Your Diet.

By drinking more milk and eating less meat men could add eight years to the "last of his life" worth more to himself and to the world. H. C. Sherman, professor of chemistry at Columbia university, stated in a recent lecture.

The adequate diet determined by recent research work in nutrition, he said, preserves more health and less waste. It increases individual efficiency and vitality. The public health movement promises to augment the life span of a man, and this life span could be doubled. Professor Sherman thinks, by a universal shift in diet.

Honey Yield In Alberta

Beeskeeping Business Has Yielded Good Returns This Season.

The beekeeping business of Alberta, which is centered mainly in the irrigated district around Lethbridge and Stirling has brought good returns this season. In the locality named the yield is estimated at more than a hundred tons from 2,000 colonies. Last year most of the local honey was wheeled at 15 cents per pound. This year a price of better than 20 cents is being received despite the larger local crop. This is due to the fact that the entire crop of western honey is only 40 per cent of last year's output in that province.

To Study Conditions

British Board of Trade Delegates to Arrive Canada.

Sir William Mackenzie, chairman of the board of trade delegation which is to make a study of industrial conditions in this continent, has arrived at Quebec from Liverpool, accompanied by F. W. Loftis, assistant secretary of labor, I. H. Mitchell, confidential officer of the ministry of labor, and H. C. Emerson, who will act as secretary of the delegation. They will be several weeks on this continent, visiting numerous centres in Canada and the United States.

Hay Exports Vary

One of the most variable Canadian export products is hay, according to the natural resources intelligence service of the department of the interior. Exports of hay vary roughly between 15,000 and 50,000 tons annually, according to the United States, Britain, France, Newfoundland and the West Indies. In the latter Canada has the largest share. The hay is used as a fodder and stock at very low prices.

Wrap Parcels In Silk

To "carry your package home" in Japan is the matter of course thing to do. If it is a lady of high degree who will produce from the capacious depths of her kimono sleeve a long, narrow, and old silver package that may have come direct from the Seven Thousand Gods of Japan or from Ikon. Ancestress. It is considered unclean and common to a degree to carry a bare package through the streets.

Special beds, tables and chairs are now provided for tall men and women at a London hotel.

A tour through any good agricultural section of Canada in the fall of the year impresses one with the fact that the greatest and most important source of Canada's wealth is in Canadian soil. The countryside is one great panoramic picture of grain crops, waving forests and livestock feeding contentedly on a thousand hillsides, meadows and pastures. The annual value of all this production exceeds two billion dollars annually, and strange as it may seem this huge mass of wealth is achieved without exhausting any natural resources or depleting any storehouse in which succeeding generations are right to feel.

Economists point with pride to the industrial skyline of Canadian cities, but there we find labor expended on what the farmer has actually produced or on the raw material, the taking of which is exhausting our forests and the great bulk of the finished product, 1926, Canada exported farm products to the value of \$817,206,321, or over \$35,000,000 more than the total export of the Dominion for the year. There is almost one billion dollars' worth of goods added to the world's supply and exceptionally large quantities of raw materials are exhausted of any natural resource. It was taken from the soil, air and sunshine, but as future generations may take it, it still grows in volume. It correct methods are practiced.

Everything possible and economically practical is done to conserve our resources and to maintain a proper balance between the nation. But the great bulk of the finished product, 1926, Canada exported farm products to the value of \$817,206,321, or over \$35,000,000 more than the total export of the Dominion for the year. There is almost one billion dollars' worth of goods added to the world's supply and exceptionally large quantities of raw materials are exhausted of any natural resource. It was taken from the soil, air and sunshine, but as future generations may take it, it still grows in volume. It correct methods are practiced.

Enough Apples For Everyone
One Barrel of Apples For Every Three Persons.

In relation to population Canada and the United States will each produce this year one barrel of apples for about every three persons of the population. The combined annual apple crop of Canada is placed at 2,000,000 barrels. The Dominion's population is 8,960,000 in round figures.

In the United States the apple crop is estimated at 40,000,000 barrels. In Ontario, Quebec, Nova Scotia and New Brunswick the combined annual apple crop of this year is slightly lower than last year, but to 40 per cent more in British Columbia than a year ago. The production in 1925 in British Columbia will total over 1,200,000 barrels. The Canadian apple crop is exported to other countries where it finds a ready market. The fruit is sold principally through the extensive organization of fruit farmers.

Where Women Are In Demand

Are Outnumbered By Men In Australia, New Zealand and South Africa.

In England there are 1,095 females to every 1,000 males, but the proportion of women in Australia is only 978 per 1,000 men. In New Zealand 957, in South Africa 942, and in Canada as low as 940—that is to say, while 96 per cent of women in England remain spinsters the dominions have large numbers of marriageable men doomed to bachelorhood. In Australia the ill-fated bachelors, according to the latest figures, number about 90,000. In New Zealand 27,000, in British Columbia 15,000 (in Canada only), and in Canada 270,000—a total of 431,000 overseas men who must either marry wives outside the dominions or not marry at all.

Too Many Books

For two years books have been published and the majority of them are of the most ephemeral interest and are forgotten within a few months of their publication. The world would be so well off if nine-tenths of the books now issued never saw the light of day. It is a pity that the publisher's dignity of print is achieved at a cost of immaturity, no matter how poor it is—London Daily Mail.

A Libelous World

A Pennsylvania court has decided that a newspaper article calling a certain man a "liar" is libelous. It seems that the word "liar" means "liar" or "quarrelsome," but one need not know that it, feel sure that the epithet is libelous. It has the look of a scandalous insult.—Youth's Companion.

The first power looms in the world for making carpets were set up at Lowell, Mass., in 1839.

The St. Louis Cardinals upset the "dope" by winning both the games at New York in the world's baseball championship series last Saturday and Sunday. The score in Saturday's game was 10 to 2. This is the first time St. Louis has had a National League pennant winning team, and it is forty years since a St. Louis team has won it.

Favorite Thespians Coming

Coming to the box theater Friday, October 22nd are the well-known Alberta Players, with Verna Felton, a favorite with theatergoers all over the west, who are this season making a trans-Canada tour playing George M. Cohan's great comedy hit, "So This is London," as a first class road show. This is the logical result following their record breaking run of ten solid weeks in Vancouver where they played this great mirth provoker during that time to over 100,000 people—thus creating a theatrical road bill for Canada, no such run ever before or since having been made by any company in this country. This record making run here in the talk of theatrical folks all over, and as a result this clever company is in demand, and is already underlined to appear in the principal cities and theaters from the Pacific to the Atlantic.

Considering the size of Vancouver, it speaks volumes for the quality of the fare presented when one grasps the fact that for eighty performances the large theater there was packed to capacity—people coming even from Everett, Bellingham and Seattle to enjoy what the Vancouver Sun characterized as "a perfect performance by a perfect cast, while the other dailies referred to as 'Just one delicious long lingering laugh' and 'Amidst bursts of continuous and ever recurring laughter, the house rocked and roared with unrestrained glee.'" And these friendly criticisms are not at all overdone on the company is particularly fortunate in having in the cast Americans for all the American parts and experienced English artists of a high order for the English characters. Verna Felton is simply immortal as Lady Duckworth, the American lady married to a titled Englishman, while Leo Millar as Brian Dwyer the millionaire American manufacturer, of a dual-toned and convincing portrayal of the man who came over to England with preconceived notions, not all of them favorable, but who finally sees that after all Englishmen and Americans are a good deal alike in the fundamentals and are intended really to be the best of friends. In his portrayal of Sir Percy Beauchamp, the English aristocrat with his million-dollar of Americans and all things American, Frank Vyvian stands out alone, without a peer in his artistic interpretation while as Lady Beauchamp, Olive Elton is the high born aristocrat to her finger tips, her every intonation and facial expression being true to life and without a flaw. The combined result is actually a perfect performance, one so admirably described by the Vancouver paper, and without the slightest hint of burlesque or buffoonery, the clever performance keeps the audience merging from one spasm of uncontrollable laughter into another.

No finer presentation of an international comedy has, it is confidently asserted by those who know, been given, not even in London or New York, where in both metropolitan centers it ran for two whole seasons, and thereby the laugh of two nations, thus carrying out the intention of the author to show both Americans and Englishmen that they misunderstood each other—and not only that, but that each of them were themselves largely to blame for the misunderstanding of the other one.

The company opens at the Grand Theater, Calgary, on Monday, October 25th.

1. Crown sketch of Viscount Willingdon drawn on board Empress of Scotland, just prior to the royal salute for Canada.
2. Crown sketch of Viscount Willingdon drawn on board the Canadian Pacific fleet Empress of Scotland just prior to the royal salute for Canada.
3. Many times, Earl Grey, belonging to the Exchequer which gained instant popularity.
4. Mrs. and Mr. Grey, the Earl and Countess of Grey, the Governor-General to Canada, showing as a sign of the royal salute for Canada.
5. Canadian Pacific fleet Empress of Scotland which carried their Excellencies to Canada.

Their Excellencies Viscount and Viscountess Willingdon made many friends on their voyage from England to Quebec on board the Canadian Pacific's flagship Empress of Scotland, when His Lordship came here in October to become Governor-General of the Dominion. They said with the aid of the press that the visit with new settlers for Canada and presiding at the various functions that take place aboard ship during an ocean voyage. Starting their popularity was Earl Grey, Earl Grey, who was with them with everyone except a dining room, who looked to him as though he might be a little more than a dignified ruler.

Canada's thirteenth Governor-General had a fine reception when the ship docked at Quebec. He struck a careful note when he told his French-Canadian audience he too could claim descent from the Norman and that French blood flowed in his veins equally as theirs. "In this country," he said, "the descendants of our two races have worked for many years under the British Crown for a common purpose and

object, namely, to promote the welfare and prosperity of the people of this wonderful country."

First impressions are vital in establishing successful relations and perhaps no impression gave so vital an effect as one of His Lordship's speeches aboard the Empress of Scotland, which was broadcast all over Canada. In it he said, "I wonder if I may venture to add one word of rather an intimate and personal character. It is this—in spite of all my fellow-passengers the best of good luck in the future and all health and happiness they can possibly expect and obtain. May I ask them one and all to give an occasional thought—a kindly thought—to one who is about to undertake very grave responsibilities for the British Empire in the great Dominion of Canada."

That is the true democratic note, sounded with modesty and feeling and sure of an unreserved response throughout the length and breadth of Canada.

Nipigon Moose Hunting

Canadian moose and deer hunting offerings until I saw things from another perspective. I was at Lake Helen by accident, after following the route pursued by a big moose hunter who had for some reason turned close to the Mission. Paul, my Ontario guide, and I had followed the trail towards the south, through the aboriginal and bird grown bottom lands and over significant altitudes. Paul declared it was a moose of immense size. The trail was gruelling and time and again I lost the faint trail of the moose.

We followed the trail again after a pause over hills the moose appeared to be in no hurry. Its steps were uniform and desultory. At no time did Paul slacken his pace and we arrived at the junction of Lake Helen and Lake Paul.

Down a hill to the water's edge, Paul in advance of me. After peering for a moment through a thicket, I discovered a dark brown object of immense proportions in what seemed at first a recumbent position.

"I go in bush and get round her," Paul whispered. "If I get round on odder side of bull she scares the come straight for you."

With this he disappeared into the thicket as silently as a wraith of smoke in the wind-charged air. How long I waited I do not know. My teeth began to chatter. It was a "fall" mooring and cold. The bull moved, venturing danger. Perhaps as a wriggle but held on his shoulder and snap shot at him. Again I rushed and pulled the trigger. "I got him," I exclaimed to Paul. The bull fell dead with a splash.

"I got him," I exclaimed to Paul. The bull fell dead with a splash. "I got him," I exclaimed to Paul. The bull fell dead with a splash.

"Yes," Paul declared in guttural. "It's easy enough to kill moose here, but it takes a real hunter to kill here where it's easy to get him out."

New Telephone Rates are Necessary

BECAUSE The old rates failed to provide any reserve provision for depreciation or storm damage or an investment for the people of the Province of \$22,000,184.57.

5 The old rates barely paid for operating expenses and interest charges on the capital debt.

6 The interest charges of over a million and a quarter annually are fixed and must be paid.

7 Operating expenses have been cut by \$101.08 per station in the last few years and only left us with a small margin to maintain the service.

8 The added revenues will secure adequate provision of the investment and put the telephone utility on a sound financial basis.

9 The individual subscriber's share of the increase is small and the increase dollar for dollar of his receipt in good telephone service.

10 With adequate and fair rates, Alberta's telephone system is second to none in America. As a subscriber you appreciate this.

Should Have Different Name

"Immigrant" Likely Distasteful to Settlers Coming to Canada

The recommendation by the manager of the Robert Simpson Company, Limited, that the term "immigrant" should be dropped in the case of newcomers from the "Mother Country," is deserving of attention.

The name "immigrant" suggests a rather unhappy-looking batch of people usually pictured as having their few belongings in a wooden chest, their surplus, or immediate necessities, in a knotted handkerchief, and wearing a dejected air. As a matter of fact, most of the "immigrants" of today travel first or second class, are people of good education and breeding, and are fairly well off financially. Many have broken up, or left behind them, poor homes.

To these the term "immigrant" may be as distasteful as it can be to Canadians.

The term "colonist" is never used in the Old Country; it has been excluded for twenty years or more. Those who were once called "colonists" are invariably referred to as Canadians, Australians, etc.

A word to replace "immigrant" would be called for.

Englishman Has Unique Hobby

Has Traveled All Over World Collecting Old Horseshoes

There is a man living in Bristol, England, whose hobby is perhaps unique—he collects old horseshoes.

Those he has picked up in all parts of the world, in Egypt, the Philippines, India, South Africa, Canada, New Zealand, Jerusalem and England.

The collector from the Philippines was found in Manila, the capital of one of the islands. As the collector picked up the souvenir, a Chinese lady was happened to be passing and sold "Lackies," showing that even in the east the superstition connected with horseshoes is known. Although the collector has traveled all over America and Canada, China and Japan, he has so far failed to find a horseshoe in any of these countries.

It is simply enough, he possesses only one English horseshoe, which he found but a short time ago. The collector was in Yokohama just after the great earthquake, but although he searched the ruins for horseshoes, he failed to find any. What he did find were the charred remains of many more.

His friend, a German, cannot, however, claim an excess of good luck from the turning of his quaint hobby, for his health has suffered considerably, due to his world search for horseshoes.

Marble Bath Up For Sale

Cut From Solid Block For Life Queen Victoria

Queen Victoria's marble bath is for sale. Although it costs more than 250 pounds it can be purchased for 200 pounds.

When Mr. Robert Peel was prime minister he invited Queen Victoria to stay at Devon House, his mansion in Grosvenor, and went to the bath. Some expense in making his home fit to receive his royal guest.

The bath attention was directed to the bathroom and he engaged Italian craftsmen to construct a bath out of a solid block of white marble. The bath was made five feet square, four feet long and as Queen Victoria's height was generally accepted as being under five feet the bath ample room for her abstinence. No one else has ever used the bath, which is still in its original setting.

Her Simple Method

A fashionably dressed lady was reminiscing with her little boy as they left the department store. "I should never permit, my son, if I were very rich."

"But what are you going to do, mother, when you don't know the name of the thing?"

"Why, just let the clerk show you everything in the case until he comes to the right one."

Exhibition Draws A Record Crowd

A new high record for attendance at the Canadian National Exhibition during the two weeks it operates has been made this year. Over 1,000,000 people having passed through the turnstiles from the opening on August 23 to the closing. The former high record was 1,512,000 made in 1924 and the figure last year was 1,481,200.

"Is your sister married, Willie?" "I dunno, I haven't been home since breakfast."

When you hear of a man without friends you may be reasonably sure that he is also without money.

The Farmer In Politics

All Over the World the Tiller of the Soil Seeks Recognition

All over the world the farmer is active in politics. He is feeling his oats. If he is a peasant he is tired of his status. If he is a farmer he refuses to become a peasant. So he is getting up to get into politics.

In England he is demanding government attention—bonuses or special legislation to bring agricultural production up to the high standard of the war.

In France it is the French farmer who refuses to be taxed to pay for the war—American war debts, for instance. The French farmer did not wish the war. He was a pacifist. The two smarties in Paris, working with the diplomats of St. Petersburg and Germany, started the war. The French farmer gave his son to the war, and in many cases gave his home to the war.

"The farmer in the dell," he feels, "is not the war." "That's enough," says the "city slicker" who started and kept this war going so long for him. And the French farmers, having a majority in the lower house, are anxious to enact any French cabinet that tries to vote taxes to pay French war debts.

In America the farmer is beginning to get into politics. He controls almost to forty senators, according to the radicalness of a measure. The farmer in the dell is feeling his oats. So Coolidge's control of congress is in danger at this election, chiefly from the farmer.

"The farmer in the dell" is feeling his oats. —From the Empress Gazette.

A Miracle Of Design

Copying Script Web Would Tax Science To Its Limit

When in Manila, Mr. T. M. T. S. Sawyer, author of "British spiders: Their Habits and Habits," puts forward the theory that the primitive web was merely a barrier and not a weaver of webs. The earliest spider's type of web still exist, lived in holes lined with silk, which they used to catch their food and to hide from it. The spider would then use the silk to form a round trap entrance. The general idea seems to be that the right thing was found to be of use in catching flies, and the principle was extended until it culminated in the spiderweb and boudoir. The spiderweb is the spider's web. The spider, at first made against walls, or on the ground, were at length converted into the spider's web. The spiderweb, and every change in environment involved a new system in the way of rays and supports. Certainly, the spider's web is web. Indeed, it may be said to have originated to date—in a stroke of design, and a calculated outcome, rendered that even to copy in nature of the plan adopted, would tax modern science to its limit.

Oldest Church In London

Tablet States Foundations Were Laid In 179 A.D.

What Mr. R. L. Smith, deputy-keeper of the British and Museum, describes as the oldest church in London is somewhat difficult to find.

To find it one must go up Crosshill, pass along a little grey by-way—St. Peter's Alley—and after wading a few steps, one comes suddenly on St. Peter's Church, with its old churchyard.

This is the spot to which all visitors to London who know of its existence make a special pilgrimage. Here is a link with ancient London. In the vestry there is a brass tablet stating that the foundations of the church were laid in A.D. 179 by Regulus Lactus. The Great Fire in London destroyed the church, and with the exception of a few great treasures, all it contained.

St. Christopher West rebuilt it as it now stands, its tower surmounted by a curious nave, resembling a few centuries' haven, and it is regarded as one of the finest specimens of West's work.

The Rev. George Bell Doughty, the rector, who has been there for many years, will show visitors his church when they call at the church and tell stories which are woven into the history of centuries.

A few years ago excavators brought to light the foundations of the church, the Roman bricks of which are still to be seen by those who descend into the darkness.

Hair Tint and Character

Color Seems to Have Bearing on Person's Disposition

People with dark curly hair standing very stiffly on the head are generally possessed of terrific temper; they are also often remarkably generous, and not a few are noted for their loyalty. With light, sandy hair are almost always a little careful with money, rather clever, and of a slow, calm, calculating nature. Dark people, with large, black or brown eyes and light, wavy hair, are generally very hasty, enthusiastic, and imaginative.

Indeed, it may be said to have originated to date—in a stroke of design, and a calculated outcome, rendered that even to copy in nature of the plan adopted, would tax modern science to its limit.

When in Manila, Mr. T. M. T. S. Sawyer, author of "British spiders: Their Habits and Habits," puts forward the theory that the primitive web was merely a barrier and not a weaver of webs. The earliest spider's type of web still exist, lived in holes lined with silk, which they used to catch their food and to hide from it. The spider would then use the silk to form a round trap entrance. The general idea seems to be that the right thing was found to be of use in catching flies, and the principle was extended until it culminated in the spiderweb and boudoir. The spiderweb is the spider's web. The spider, at first made against walls, or on the ground, were at length converted into the spider's web. The spiderweb, and every change in environment involved a new system in the way of rays and supports. Certainly, the spider's web is web. Indeed, it may be said to have originated to date—in a stroke of design, and a calculated outcome, rendered that even to copy in nature of the plan adopted, would tax modern science to its limit.

Farm for Sale

10 PER CENT CASH—
BALANCE IN 25 YEARS

The Soldier Settlement Board of Canada offers for sale by Public Sale, the Northwest quarter (S. 1, 1/2) of Section Five (13), Township Thirteen (13), Range Twenty-two (22), west of the Fourth (4th) Meridian.

The purchaser of this property will be required to deposit 10 per cent of the purchase price in cash and 10 per cent of the balance in 25 equal annual payments of 10 per cent of the purchase price.

Terms of sale are 10 per cent of the purchase price in cash on acceptance of the tender, and the balance in 25 equal annual payments of 10 per cent of the purchase price.

Each tender must be accompanied by an accepted cheque for \$100. If tender is accepted, this sum will be credited to the purchase price of the land. If tender is not accepted the money will be returned to the tenderer.

Tenders will be opened at Calgary, Alberta, on Monday, October 18th, 1926.

The highest and best tender not necessarily accepted. If the land is not sold on the date above mentioned, the Board will be prepared to receive offers to purchase until such time as it is finally disposed of.

Tenders should be in plain envelopes marked "Tender for the purchase of N.E. 1/4 S. 13-25 W. 4th Meridian." Address tenders and enquiries to:

The Soldier Settlement Board of Canada.

Wife and Husband Both Ill With Gas

"For years I had gas on the stomach. The first dose of Alkermes helped. I now sleep well and all gas is gone. It also helped my husband," (cagued) Mrs. B. Brinkley. ONE spoonful Alkermes removes GAS and often brings astonishing relief to the stomach. Stomachs that full bloated feeling. Brings out old, waste matter you never thought was in your system. Alkermes is wonderful for chronic constipation. Claresholm Pharmacy.

James Rice Suicides at Red Deer

Red Deer, Oct. 13.—James H. Rice, a well-known local barber, committed suicide here Monday night by hanging himself with a rope in his own garage. The tragedy was discovered shortly after midnight by his wife. Mr. Rice left home at 7.45 p.m., when he told his wife he was going down to his shop on Ross street. After waiting until midnight, Mrs. Rice became alarmed and went to the garage to investigate, and saw the car standing outside with deceased's coat therein and the garage doors fastened. She conveyed the coat to the house and returned with a flashlight, and tried to open the doors. When she discovered the body of her husband she ran to Mr. Munro's, a next door neighbor, reported the matter and broke down. She was accompanied back by Mr. Munro, who immediately phoned Chief of Police Streetfield, who arrived on the scene shortly afterward with Dr. Backus, the coroner, who, after a thorough investigation, decided an inquest was not necessary, death being due to suffocation from hanging and self-inflicted. Examination proved that deceased had been dead for three hours. He leaves besides his wife, one son aged 12 years.

James Rice was well known in Claresholm, having worked at his trade here in the shop of W. McKenzie for a time, some years ago.

W. I. District Conference

The Claresholm and Macleod W. I. district conference was held at Granum on Friday, October 8. All conveners of standing committees were re-elected.

Mrs. Dave Mulholland of Starline branch was elected as successor to Mrs. Sutherland of Macleod as district convener. Mrs. Fred Laing of Starline, successor to Mrs. Perry of Macleod as district secretary.

Starline visitors at the conference were: Mrs. Mulholland, Mrs. Schram, Mrs. Laing, Mrs. Mosley, Mrs. Chilton, Mrs. Toomey, Mrs. Strang, Mrs. Ross and Mrs. Davies, the latter being Starline delegate.

The slogan for this district for 1927 is "Smiles and Flowers."

Card of Thanks

We wish to express our thanks to our friends and neighbors, especially to Mr. William Barr and Mr. Lange, for their kindness during our recent bereavement also for the beautiful floral tributes which were sent.

Mrs. Butts and Family.

Notice is given that all cattle or other stock found running at large within the town will be impounded without further warning. There seems to be a tendency to turn cattle out at this time of the year. Owners will do well to remember that the bylaw is in effect all the year round.

Speed up Business with

CHEVROLET Coupes for salesman's use and Chevrolet Utility Express Trucks for hauling and delivery are speeding up business for thousands of firms in Canada. Careful owner records show that Chevrolet pays for itself many times over in lower operating costs, in freedom from taxes, and in longer life. These records prove beyond doubt that Chevrolet cars and trucks provide the most economy of transportation in commercial use. Ask your Chevrolet dealer to show you the reports of actual Chevrolet owners. They may suggest ways in which Chevrolet can speed up your business and cut down your costs. The Smoothest Chevrolet in Chevrolet history is selling at the Lowest Price for which Chevrolet has ever been sold in Canada. Ask about GMAC Plan of Deferred Payments.
